

Mohammad Hossien Jazi

Android Developer

About Me

I am trying to learn android professionally and I want to be a best designer and developer in android. I study english in collage but I want to be a android developer. I started learning android six month ago. I like android and designing app. I like to progress in android and struggle with problem to design best and prefect app.

Education

Bachelor Of Translative English

Payame Noor University, 2014 - 2019

Introductory Android Developing By Java

Mehregan institutie, 50 hours

Skills

Architecture:

MVVM, MVP

Language:

JAVA, Kotlin

Concept:

OOP, SOLID

DataBase and File:

Sqlite, Room, File working

Ui :

CustomView, layouts

Material Design Component, Material Design Concept

Transition

Animation

Api:

Json, Gson, Retrofit, RestApi

Git :

Push, Pull, Include

FireBase :

Crashlytics, CloudMessage, in-AppMessage, RemoteConfig

Design patterns :

Singleton, Adapter, Builder, Factory

Librarys :

Circular image, ImageSlider, Butterknife, Glide, Picasso, Repository, ExoPlayer, ShimmerLayout, skeleton Shimmer, Material and SupportDesign, Rxjava, Dependency injection (Dagger), Lottie

Experience

UnsplashWalpape:

I design App to struggle with problem in realworld.

You can download Picture in three quality, Set it for Home and Lock Screen and Selected as favorite to hold Picture inside the App. This App design to get Random picture from unsplash Api by Retrofit.

Implemented technology in App:

- Unsplash Api
- RecyclerView, Adapter
- Custom View and Dialog
- Glide, Image Slider, ExoPlayer
- Shimmer, ButterKnife
- Manage BackStack
- Flexible UI in Portrait and Landscape
- Fragment, Splash Activity
- AsyncTask
- Coordinator Layout
- Bottom and Drawer Navigation
- Collapsing Toolbar
